Figma

💼 Project Experience

CodeLib
September 3rd 2024 - September 10th 2024
- Created a practical platform, utilizing modern frameworks and handle on-demand publishing of the website in a very small timeframe.
- Leveraged practicality, accessible styling and user experience specialized libraries, such as Zustand for state management , next-intl for i18n and Auth.js for seamless authentication.
- Optimized the website for production and handled SEO based on best practices.

Tech Stack: Next.js, React, Typescript, TailwindCSS, Upstash Redis, Node.js.

TaskJourney
May 2024 - August 2024 (and beyond)
- Handled a complex system development job as a solo developer for over 3 months.
- Created a progressive app by utilizing modern web frameworks.
- Optimized All metrics on Lighthouse to a score of 90+.
- Made a seamless user authentication system with Google's Firebase Auth service.

Tech Stack: Next.js 14, React, Typescript, TailwindCSS, Firebase, Node.js.

LinkserV
November 2023 - April 2024
- Created and designed an innovative system for the first time in my web development journey.
- Worked with a tight constraint to only use HTML, CSS, JavaScript and SQL.
- Successfully implemented login & sign up methods for users, editing dashboard, profile viewer, a server with dynamic routes and more.

Tech Stack: HTML5, CSS3, JavaScript, Express.js, SQLite3.
